Frontend design: blue and white

Design system, shared components and the screen states every page must handle. Every screen in this pack uses these same colors, sizes and components.

Rules: body text 16px; touch targets 44-48px; status never shown by color alone (each badge has a text label); system fonts, no downloads; text contrast at least 4.5:1.

Colors

#0B2E6B	#1550B0	#2F80ED	#E6F0FF	#F3F8FF	#0F172A
Header	**Primary**	**Focus**	**Panel**	**Page**	**Text**

Type scale (system fonts)

Email address

student@school

Enter a valid email address.

State screens (API layer)

Loading: skeleton blocks keep the layout still on slow networks.

No papers yet

Be the first: tap Upload to add a paper.

Could not load documents. Retry Ref req_12345abc

You are offline. Showing saved pages.

Library screen

Layers shown

- Navbar, SearchBox, FilterChips, DocumentCard, BottomNav (shared components)

Data

- GET /documents with course_id, year, semester, document_type, page and page_size
- Only Verified documents are listed

Actions

- View opens /documents/{id}/content?disposition=inline
- Download uses disposition=attachment

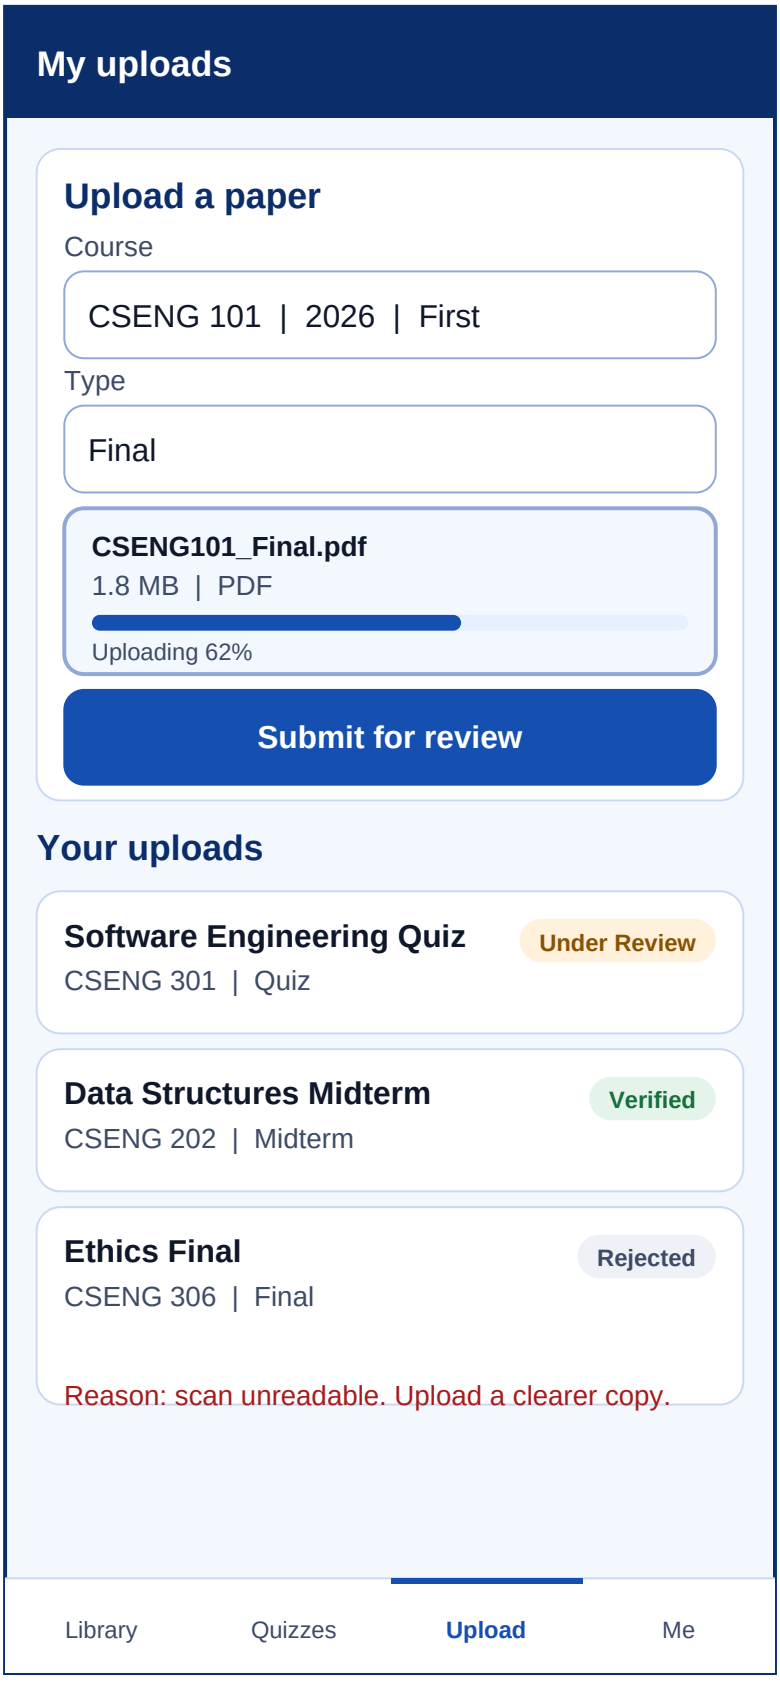
States

- Loading skeletons, empty message, error with Retry and request ID

Phone rules

- Filters wrap; bottom navigation; 20 results per page

Upload and status screen



Data

- POST /documents (multipart: file, course_id, document_type)
- GET /documents/mine for the list below

Rules

- PDF, JPEG, PNG or WebP, up to 10 MiB
- Photos compressed in the browser before upload
- Progress bar and a Retry button on failure

Statuses

- Under Review: waiting for the lecturer
- Verified: public with a stamp
- Rejected: shows the reviewer's reason

Pending

- Year and semester come from the chosen course; confirm with the backend

Verify stamp screen (public)

Verify a document

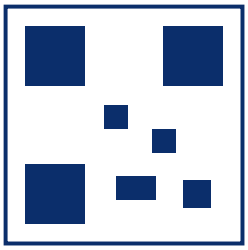
Verified

Stamp ID LLT-2026-0001

Course
CSENG 101 | Introduction to Programming

Approved
14 Oct 2026

Approved by
Lecturer



Revoked

Sample Mathematics Past Paper

Withdrawn on 20 Oct 2026. Do not rely on it.

Check another ID

Sample data for design only.

Data

- GET /verification/{token}, no login needed
- The QR code opens /verify/:token on the frontend

Shows

- Status, stamp ID, course, approval date, approving role
- No uploader name on a public page

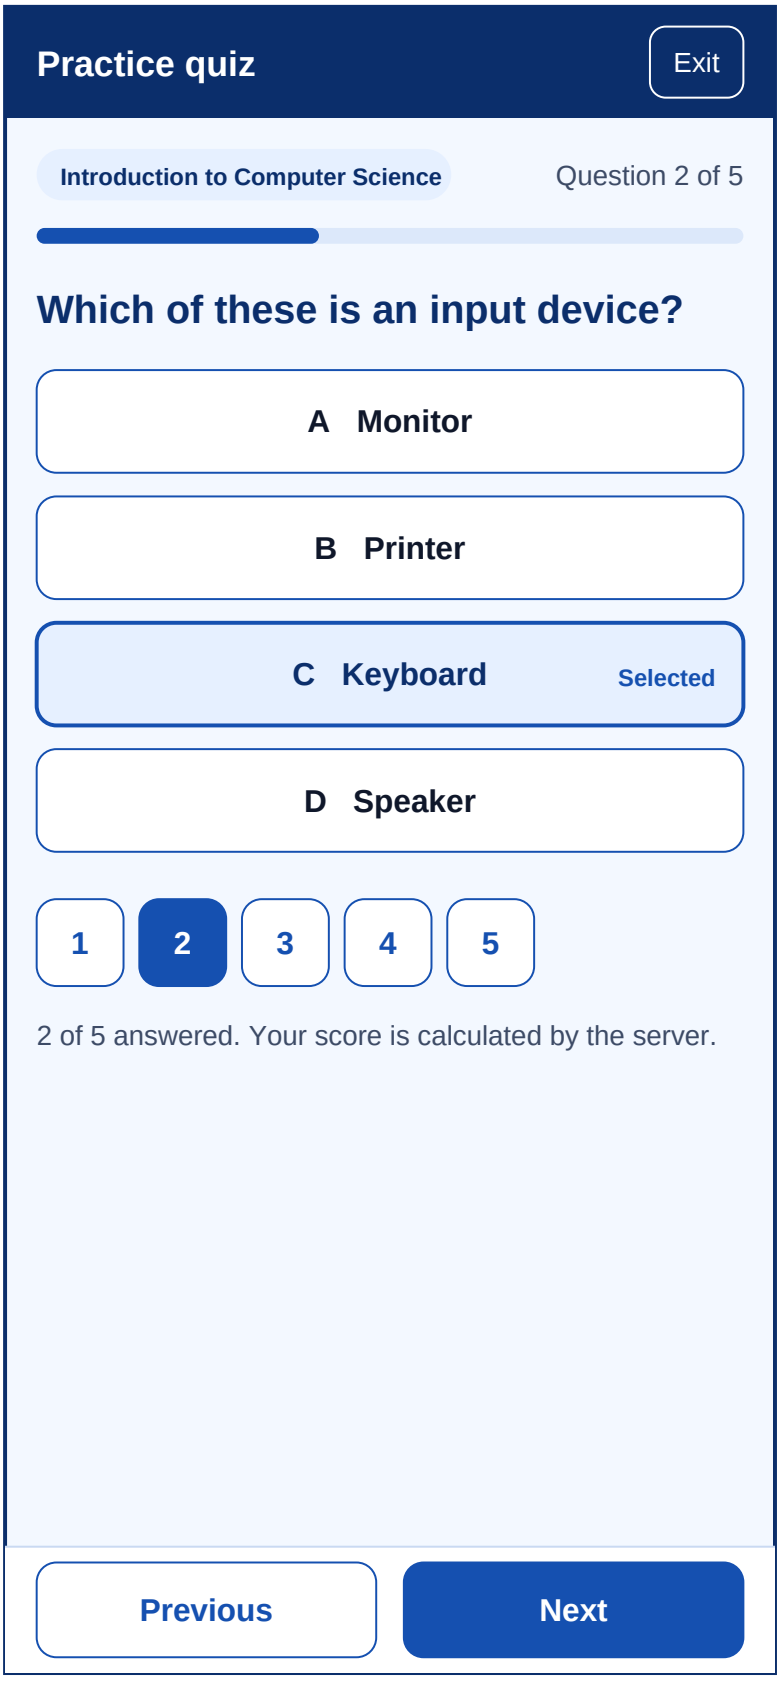
Revoked

- Red badge and a clear warning; the token keeps working

States

- Not found and server error are different messages

Quiz screen



Data

- GET /quizzes/{id} for questions (no answer keys)
- POST /quizzes/{id}/attempts with question_id and selected option index (route to be confirmed)

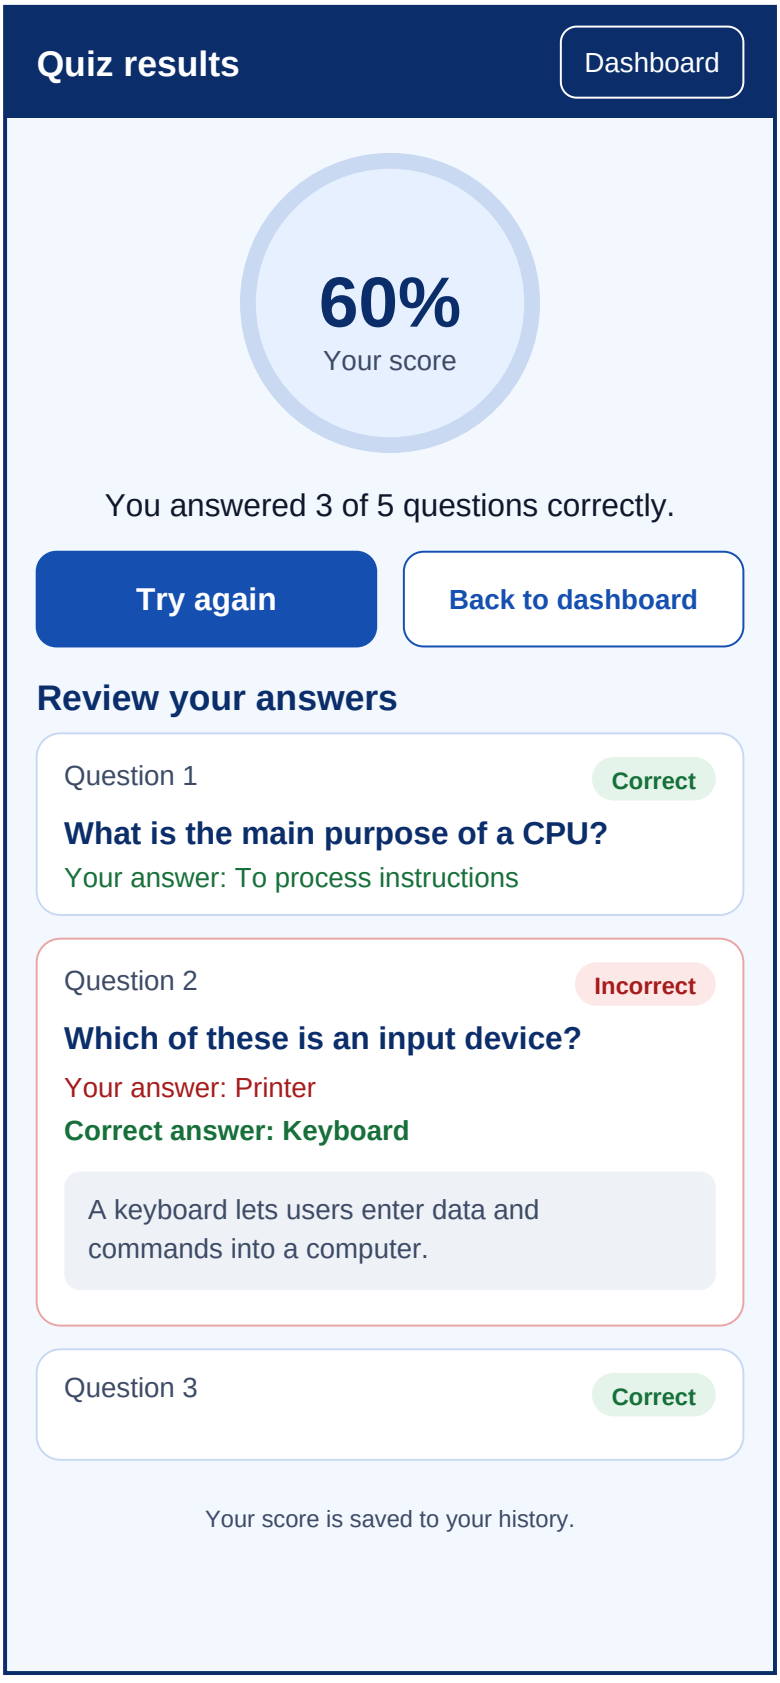
Rules

- One question per screen, jump row for any question
- Score is calculated by the server only
- Confirmation dialog before submit

Next screens

- Result with per-question review (needs API support)
- Score history from GET /quiz-attempts/mine

Quiz result screen



Data

- Response of POST /quizzes/{id}/attempts: score and total_questions
- Per-question review needs selected, correct and is_correct from the server (pending backend)

Rules

- Score and answers always come from the server
- Correct answers appear only after submitting
- Explanation text needs a column in quiz_questions (proposed)

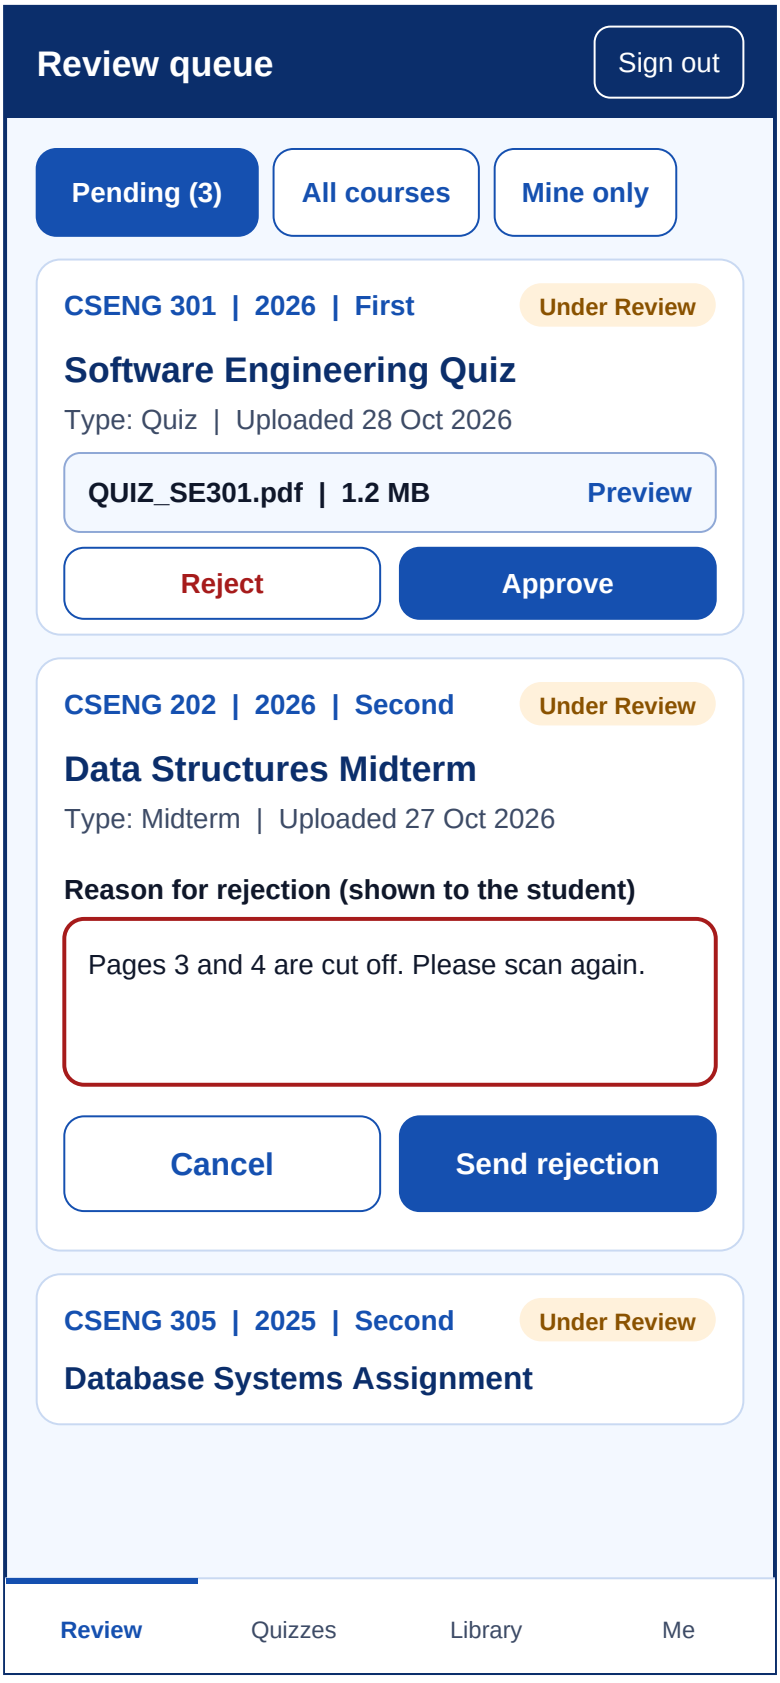
Actions

- Try again starts a new attempt
- History from GET /quiz-attempts/mine

States

- Not answered shows as Incorrect with the right answer

Lecturer review queue



Data

- Pending list: GET /documents with a status filter (pending backend)
- Approve or reject: PUT /documents/{id}/review

Rules

- Lecturers see only their assigned courses
- Approval creates the stamp ID and QR code
- Rejection needs a reason, shown to the student on My uploads
- Moderators and Admins see all courses

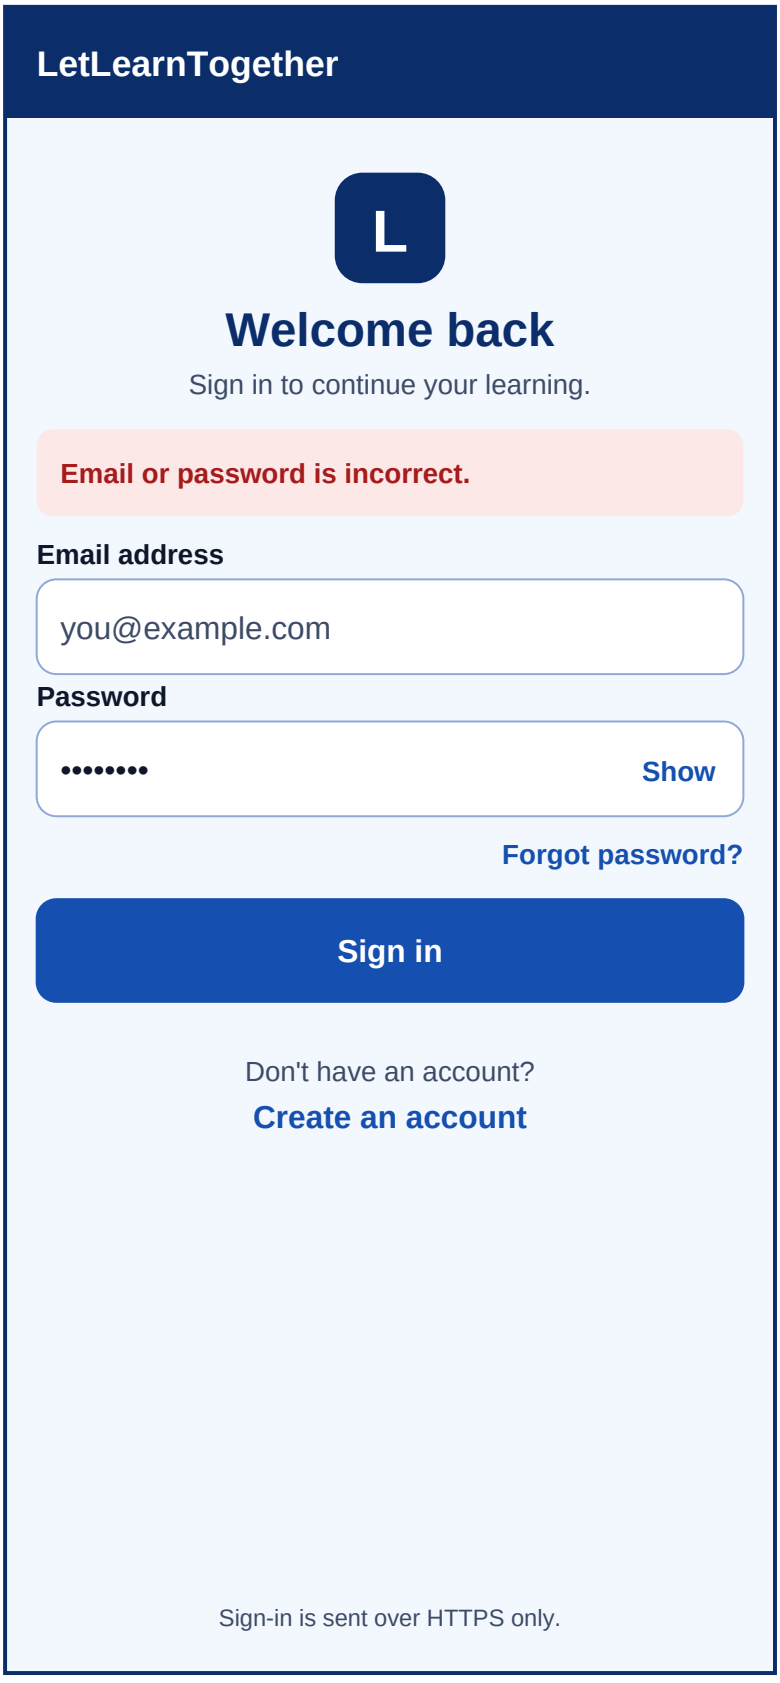
Phone rules

- Reject opens the reason box in place
- Preview opens the file before deciding
- Buttons are at least 36px; use 48px for the main action once real

States

- Empty queue shows All caught up
- Errors show Retry and request ID

Sign-in screen



Data

- POST /auth/login returns access_token
- Then GET /auth/me to learn the role

After sign-in

- Student: library
- Lecturer: review queue
- Moderator: reports
- Admin: users

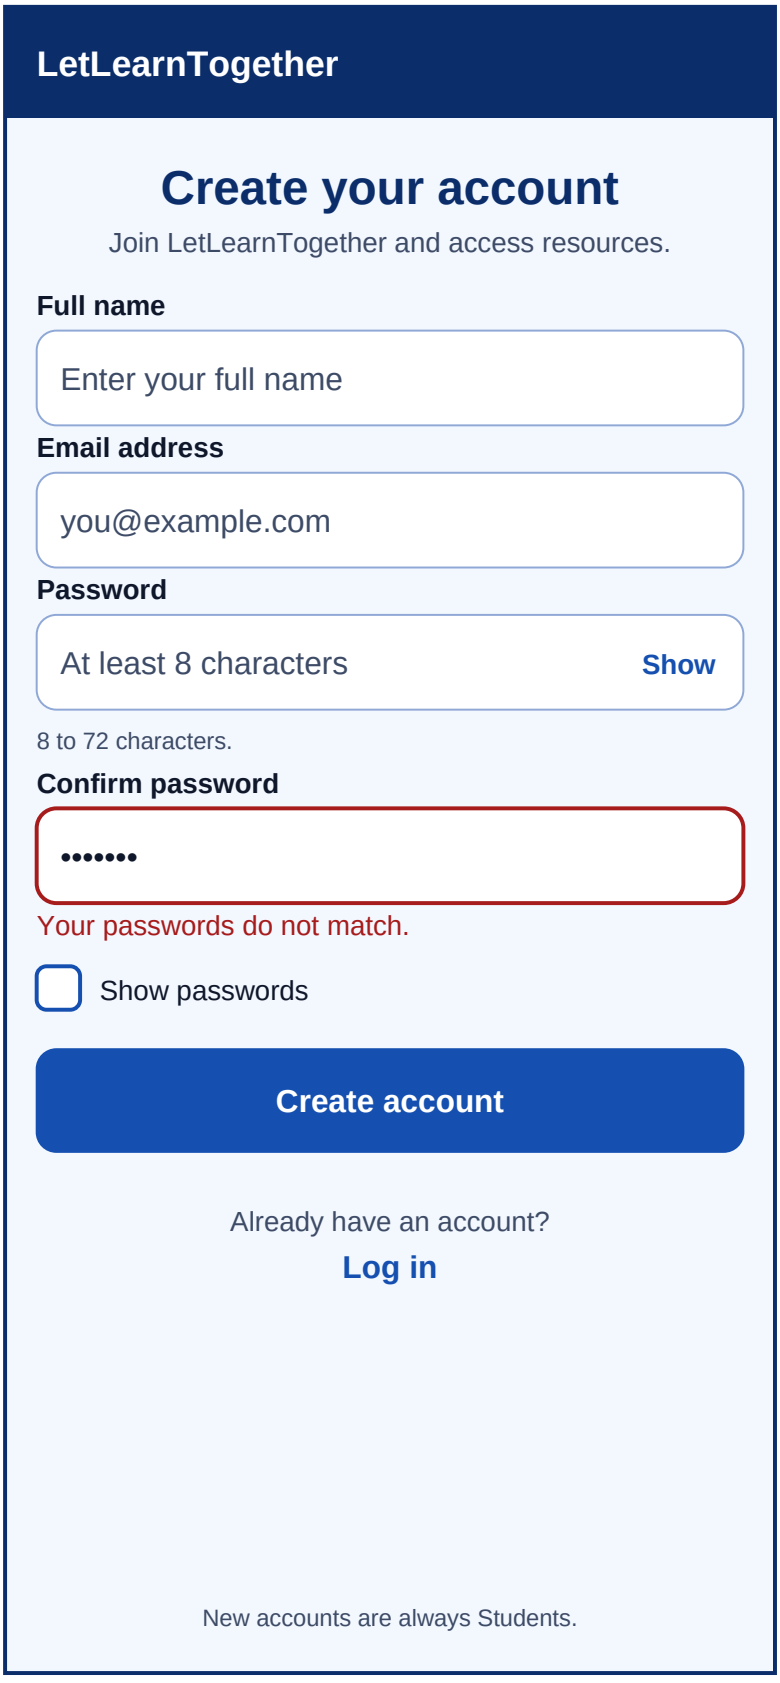
Rules

- Wrong credentials show one clear message (role alert)
- Button shows Please wait and is disabled while sending
- Show or Hide password toggle; inputs 16px so iOS does not zoom
- Keep the page the user wanted and return there

Pending

- Forgot password: the course requires it but the backend contract has no reset route

Register screen



Data

- POST /auth/register with name, email and password only
- Never send a role; the server always creates a Student

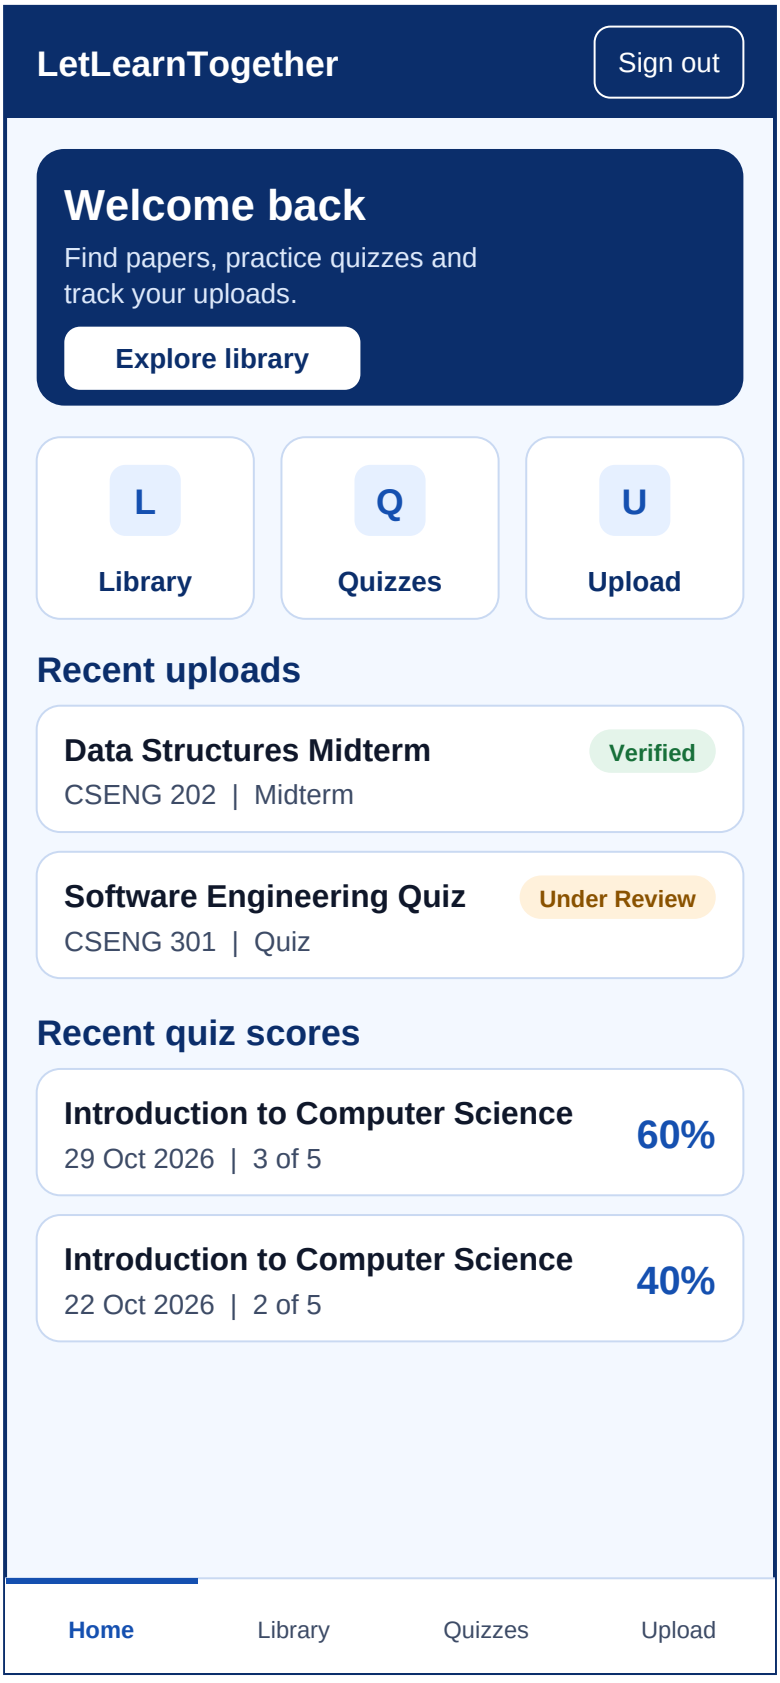
Rules

- Password 8 to 72 characters (bcrypt limit)
- Confirm password is checked in the browser only
- Server errors are shown next to the right field
- On success go to sign-in with a success message

Pending

- School email rule: the course says school email or approved alternative; the backend has not defined it

Student dashboard



Data

- GET /auth/me for the name and role
- GET /documents/mine for recent uploads
- GET /quiz-attempts/mine for recent scores

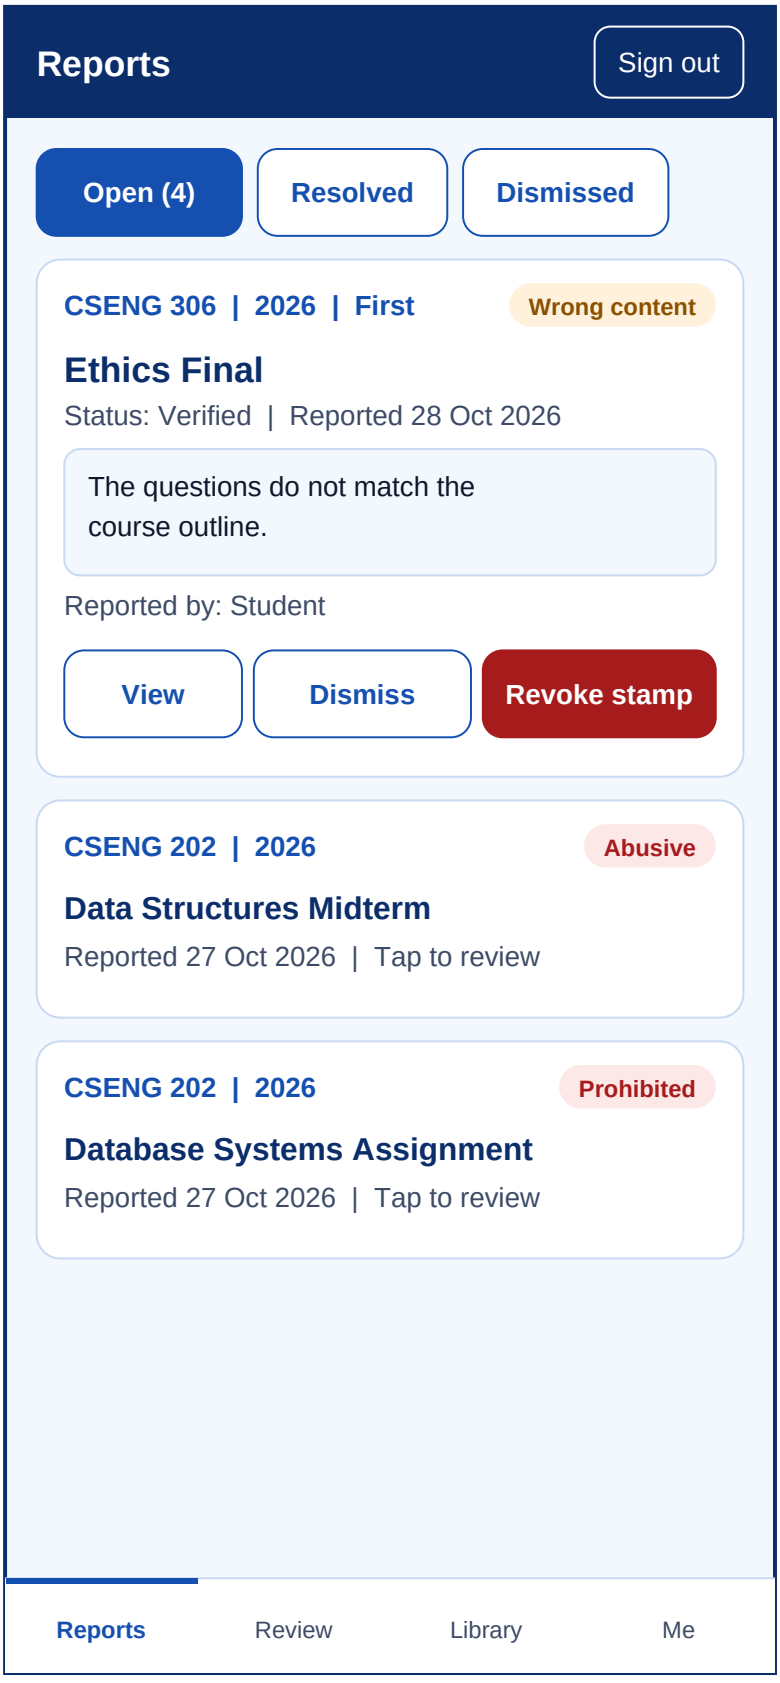
Rules

- Shows only real data: no made-up progress numbers
- Empty lists show a short message and a next step
- Lecturers, moderators and admins open their own queue instead

Navigation

- Tiles go to Library, Quizzes and Upload
- Bottom navigation stays on every screen

Moderation reports



Data

- GET /reports and GET /reports/{id}
- Moderator and Admin only

Actions

- View the reported document
- Dismiss the report with a note
- Revoke the stamp, which the public verify page then shows as Revoked

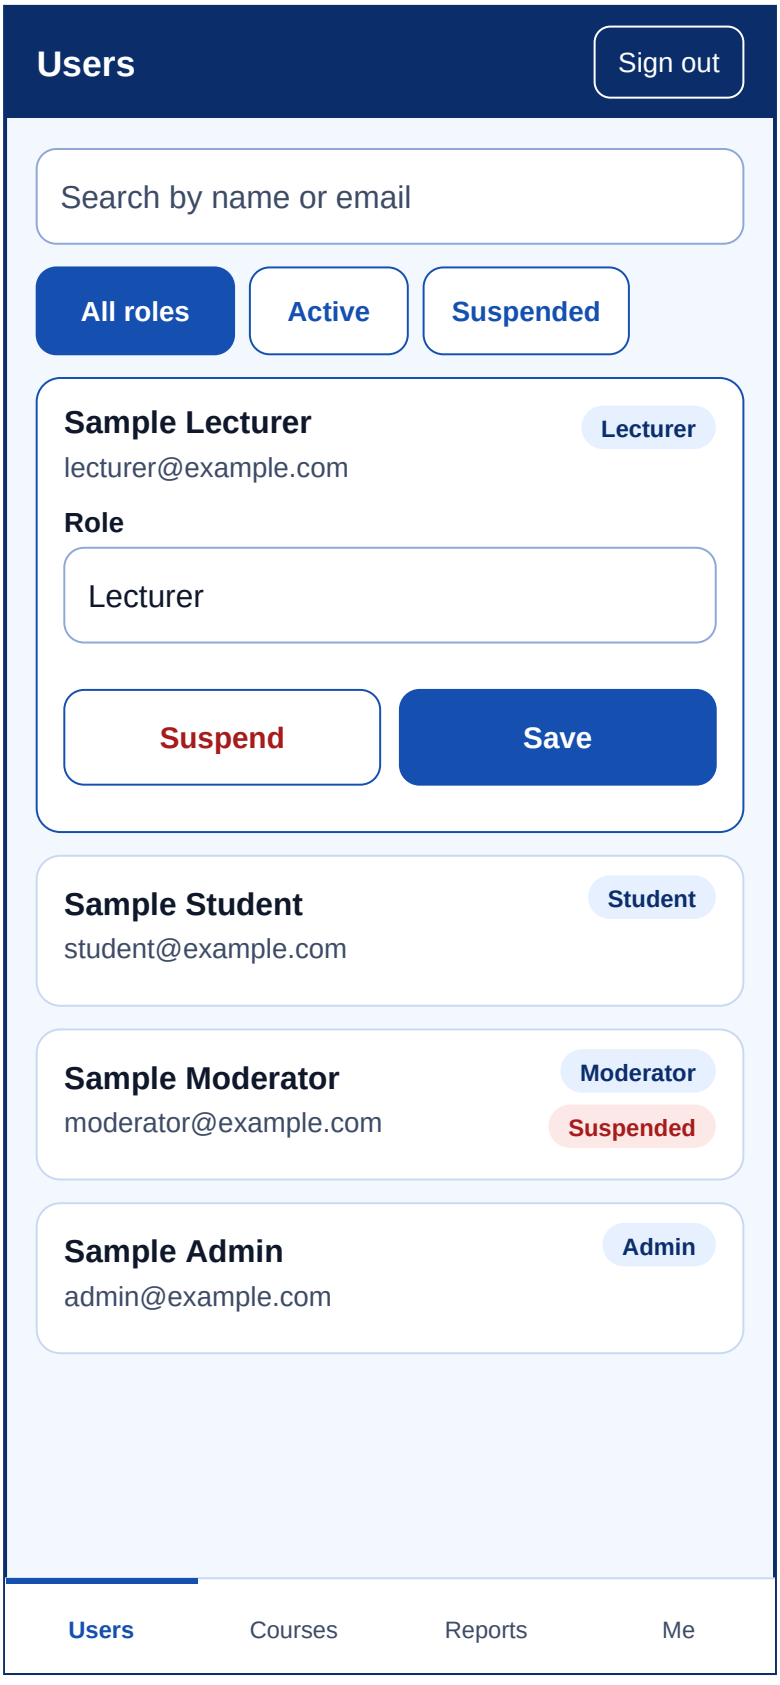
Rules

- Reasons: wrong content, abusive, prohibited, other
- Every action is logged with who and when
- Revoke asks for confirmation first

Pending

- Route for dismiss or resolve is not in the contract

Admin: users



Data

- GET /users and GET /users/{id}, Admin only

Actions

- Change role (the only way to create Lecturers, Moderators and Admins)
- Suspend or restore an account

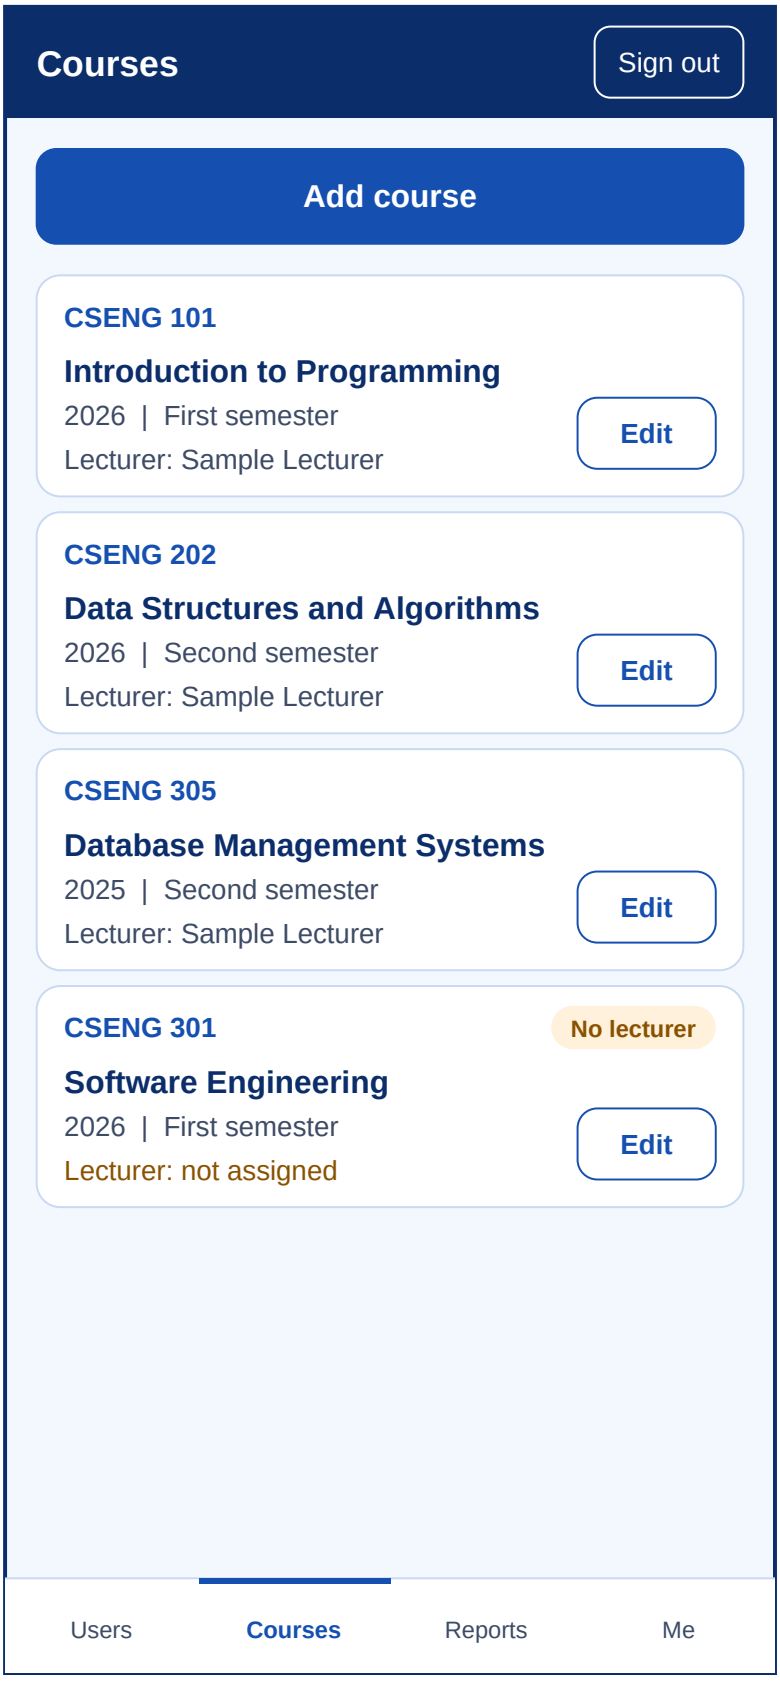
Rules

- History is kept: accounts are suspended, not deleted
- Confirm before changing an Admin's role

Pending

- Update and suspend routes are not in the contract; is_active is a proposed column

Admin: courses



Data

- GET, POST, PUT and DELETE on /courses, Admin only

Rules

- A course is one term: code, title, year, semester
- Code + year + semester must be unique (proposed ERD fix)
- Assign a lecturer; this controls who can review and make quizzes
- Delete is blocked when documents exist

States

- No lecturer shows a warning badge
